

QUALITY TOOLS THAT GO TO WORK WITH YOU®

WELDING, BRAZING CUTTING AND HEATING EQUIPMENT

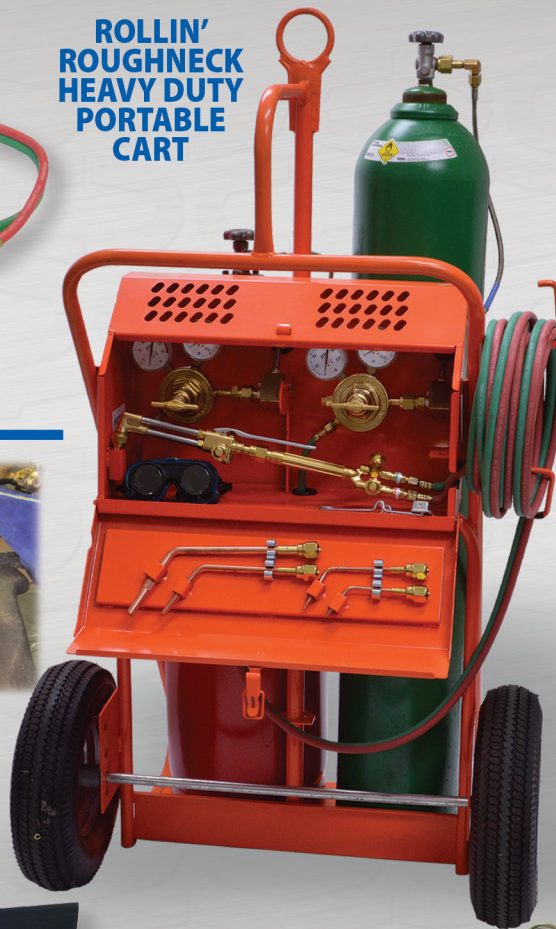

KL350-P-TU

Our portable unit has everything you need to take the torch to the job. Complete unit includes cylinders, outfit and accessories.

ROLLIN' ROUGHNECK HEAVY DUTY PORTABLE CART

KR350

All American medium duty Oxyacetylene complete outfit for cutting, welding and brazing

80060

The roughest, toughest, most complete V-Style Rollin' Roughneck heavy duty portable oxyacetylene welding and cutting system you'll ever find.

Available in H-Style as well as A-Style.

"THE WORKS"

Complete 12 piece, easy-to-operate all purpose outfit for cutting, welding and brazing that's packed in it's own rugged Wurks Box with a compartmented accessory tray.

Available in:
V-Style [Tube Mix]
H-Style [Head Mix]
A-Style [Tip Mix]

STRIKER-VHD

The Uniweld Striker is a complete heavy duty Oxyacetylene outfit for cutting, welding, brazing and heating.

ALLOYS

SCORCHER®

WB500 PROPANE GAS TORCH KIT

A 500,000 BTU Propane Gas Flame Tool for use on farms and ranches; at home and business; in construction, maintenance and factories; on railways; in parks and on highways.

UAB

- All-in-one flux cored aluminum brazing alloy
- Continuous coil produces less wasted material than brazing rods
- Cadmium free zinc-aluminum brazing filler metal
- Flux inner core means no manual flux application is required
- Low temperature self-fluxing alloy ideal for brazing aluminum to aluminum or aluminum to copper (Dissimilar Metals)
- Applications include HVAC and Refrigeration repairs, patching holes in aluminum coils and brazing a copper to aluminum transition fitting

UNI-4200 Self Fluxing Aluminum Rods

Used for joining and repairing aluminum extrusions and castings.

Also, can be used for the manufacture and repair of aluminum doors and windows, repairing ladders, gutters, siding, aluminum boats and instrument boxes. Most Kirksite and Zinc based dies can be repaired with this alloy. May also be used as a wear-facing alloy on aluminum.

SCAN TO VIEW WELDING CATALOG

UNI-BRITE 1450A

A low working temperature of 430°F [221°C] eliminates weakening of the base metal caused by high heat brazing, resulting in greater overall strength of the components being joined.

ARTORCH®

PINPOINT FLAME TOOL

Made in U.S.A. Artorch® is a true professional mini-flame instrument that welds, brazes and solders most metals.

Jewelers • Artists • Opticians • Dentists • Electronic Technicians and Light Duty Repairs.

Operates efficiently with Oxygen and most fuel gases including: ZAPP GAS®(Propylene), Acetylene, Propane, Hydrogen and Natural Gas.

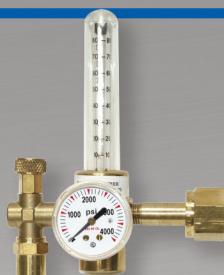

QUALITY TOOLS THAT GO TO WORK WITH YOU®

REGULATORS AND FLOWMETERS

DEF14 SERIES DEF14

Designed for production and maintenance applications where stainless, aluminum pipe or closed vessels are TIG or MIG welded and where shielding gas and purging gas are simultaneously required.

FR13 - FR14 SERIES FR13 FR14

Combination regulator and flowmeter in one unit. Available in single gas and two gas calibration.

UCF13 - UAF14 SERIES UCF13 UAF14

Flowmeters can be used on regulators or pipe line distribution installations. Flow tubes and balls are easily changed for various single or two gas readings. Calibrated at 50 psi inlet pressure at 70°F.

RV8010 - RV8011 HEAVY DUTY REGULATOR

Extra large 3-1/4" stainless steel diaphragm for the biggest jobs. Forged brass body and bonnet, equipped with our largest easy-to-read 2-1/2" gauges. Available in Oxygen, Acetylene, LP, Carbon Dioxide, Argon, Nitrogen, Helium, Hydrogen and Air Service.

RUH8210 - RUH8211 MEDIUM/HEAVY DUTY REGULATOR

Ideal for all medium duty applications. Machined brass body with chrome bonnet. Delrin bushing provides smooth adjustment for the easy-to-read 2" gauges. Available in Oxygen, Acetylene, LP, Carbon Dioxide, Argon, Nitrogen, Helium, Hydrogen and Air Service.

MR8210 - MR8211 MEDIUM DUTY REGULATOR

Perfect for medium duty economical applications. Machined brass body and bonnet. Easy-to-read 2" gauges. Available in Oxygen, Acetylene and LP.

HAND TORCHES

UniWeld Self-igniting Hand Torches eliminate the need for a flint lighter. Lightweight and portable, these flame tools can be operated with Propane or Propylene.

MACHINE TORCHES

Also Available with Racks. Part #'s 68-6R and 68-R
Also Available in H-Style and A-Style

68
[V-Style] Tube Mix
Capable of cutting up to
8" with proper tip.
(1-101 series tip)
10" Multigas Machine Torch.

68-6
[V-Style] Tube Mix
Capable of cutting up to
8" with proper tip.
(1-101 series tip)
6" Multigas Machine Torch.

6700BA-Bevel Adaptor
Adjustable head Bevel Cutting
Adaptor with calibrated dial
lets you set angles from
0° to 90° to cut bevels without
tilting the Machine Torch.

TORCHES

830-21

[V-Style] Tube Mix
Capable of cutting up to 12" [30.4 cm]
with proper tip. 21" Torch.

EC350AL

[V-Style] Tube Mix
Capable of Cutting up to 5"
with proper tip. (3-101 series tip)
19" Light Weight Torch.

40A-21

[H-Style] Head Mix
Capable of cutting up to 12" [30.4 cm]
with proper tip. 21" Torch.

50A-21

[A-Style] Tip Mix
Capable of cutting up to 12" [30.4 cm]
with proper tip. 21" Torch.

Additional Torch sizes up to 60"
are available in V, H & A Styles.
Custom sizes are available on demand.

FLASHBACK ARRESTORS

FLASHBACK ARRESTORS WITH AND WITH AND WITHOUT QUICK CONNECTS/QUICK CONNECTS/CHECK VALVES

Uniweld's Quick Connects provide fast, reliable and positive connections and quick disconnections for torches and regulators. Uniweld's Flashback Arrestors help prevent the propagation of a flame upstream towards the cylinders as Check valves provide an added protection against reverse flow of gases, but not flashback.
